Bug-fix and new features tasks

• □ [Fernando] Kernel: Document basics • \square [Fernando] Add GPIO toggle in the core class and connect to oscilloscope • □ [Fernando] More than 4 parameters • □ [Fernando] Call external command file(s) to automate code build • □ [Nikos] Confirm An update on Studio will NOT delete Projects directory • □ I2C and I2C-GLCD are working only with LPC1768, fail with STM32F401,L152 and nRF52 (os5) to investigate/solve • \square [Fernando]Investigate: Using 2 nodes of the same type, the parameters changed on one, change also in the 2nd node □ SimpleSerial does not work with os5 □ [Nikos] Blink example for different CPUs (LPC1768, LPC11U35, STM32L152, STM32L432, nRF52832 • □ [Nikos]Define/Implement a sharing method for the Blink examples • \square [Fernando]feasibility review for commit, push, pull, update from inside Studio using hg from Python
 □ Share Projects mechanism (our server or bitbacket with a kind of automation?)
• \square Store nodes, no need for internet connection at Studio startup • \square Internal signals as events to be used as inputs to nodes, in style: registering event for callback □ At the code templates http://www.n-blocks.net/panel.php?p=author, to be clear how the parameters are passed ■ New automatic installation • \square [Fernando] rtos: Simple examples for building a project without the graphics environment • \square Define a node version management methodology, avoid braking working projects with new node versions
